

TODDLER GEAR PICKS

Toddlers are curious and quick little humans. Here are a few of our favorite items to help keep everybody safe and comfortable at camp.

Pack and Play Darkening Tent

Toddlers are curious humans. giving them their own space at night can help them adjust to changes at camp, and keep them in bed just a little longer after the sunrises..

Water Resistant Suit, Reima

Between sitting in wet grass, stomping through mud, and falling down at camp, little ones can need a few outfit changes before bed. This durable, breathable suit keeps them dry and "clean" until bedtime.

Big Mo, Morrison Outdoors

Our little ones weren't quite ready for their own sleeping bags until they were 3-4yrs old. The Big Mo is a great option for kiddos who are relatively mobile through the night, and keeps them warm and "tucked in" when it's cold at camp.

Kula Cloth

Potty training a toddler at camp? Even under the best of circumstances, you might find yourself helping your little one pop a squat outside. This anti-microbial cloth will help everybody stay dry!

Redmond Waterproof Hiking Shoe

Your little one is probably already climbing, running, and exploring harder than you imaged. Give them a waterproof shoe with some solid traction!

Camping Chair, Melissa and Doug

Toddlers love having a chair just their size. This one is not only the perfect height, it's also adorable as all get out.

Mini Power Bank

From white noise to cameras to maybe even the iPad on a rainy day at camp: we can't deny that electronics sometimes come along for the adventure. Keep them charged with a portable power bank.

Warm Weather Sleep Sack

Camping in the desert? Or in your backyard on a warm summer evening? This sleep sack is perfect for temps between 59F and 70F.

Zinc Oxide Mineral Sunscreen

You can't apply enough sunscreen when you spend the whole day outside. Instead of using harsh chemicals, find something safer for your little ones, and the environment. This is one of our favorites!
